

Workplace Safety Index 2020: Transportation and warehousing

Risk Control services from Liberty Mutual Insurance

Looking for more comprehensive safety information?

As a policyholder, you have exclusive access to risk control tools and resources through Liberty Mutual SafetyNet™

visit lmi.co/safetynet

The top five injury causes account for over \$2.95 billion in costs and represent 61 percent of total workers compensation direct costs for non-fatal claims with more than five days away from work in the transportation and warehousing industry.

Understanding top risks in the workplace is the first step to protecting your business. Did you know: Liberty Mutual SafetyNet™ has sophisticated technical resources to help prevent overexertion, falls, and many other transportation and warehousing-related exposures.

Scientific methodology: The 2020 Liberty Mutual Workplace Safety Indices are based on 2017 data from Liberty Mutual, the U.S. Bureau of Labor Statistics (BLS), and the National Academy of Social Insurance. BLS non-fatal injury data are analyzed to determine which events caused employees to miss more than five days of work, and then rank those events by total workers compensation costs.

Note: Overexertion due to lifting activities often causes sprains or strains to the back or shoulder as a top concern for the Retail trade industry, and this industry secondarily experiences fall-related injuries as well. Other exertions or bodily reactions is defined by the BLS as, "...generally resulting from a single or prolonged instance of free bodily motion which imposed stress or strain upon some part of the body. This category also includes the assumption of an unnatural position for a prolonged period of time.
